

## Important update on the Advent Vega

Further to our announcement in December 2010 we are pleased to announce that the Advent Vega is now fully certified for the installation of Adobe® Flash® Player 10.1

Adobe® Flash® Player 10.1 allows you to view Flash® content from popular website such as the BBC iPlayer and other Flash® based video sites.

We have released a full system image for your Advent Vega from today which has the Adobe® Flash® Player 10.1 software installed. This image will reset your Advent Vega settings and content; we recommend that you back up your files and settings before completing this. Instructions for completing the set up are available from the Advent Vega support site (<http://www.myadventvega.co.uk>)

For customers that would prefer not to install the full system image we will be releasing an automatic update tool from Tuesday 15<sup>th</sup> February 2011 – This utility will update and install the latest Adobe® Flash® Player 10.x software. We recommend that customers who install the full system image also check back from the 15<sup>th</sup> February 2011 and install the update software to ensure their system remains up-to-date in the future.
